

## **Dr. Mustafa KÜCÜKALİ**

He completed his undergraduate education in the Department of Computer Education at Gazi University, and his master's and doctoral studies at the Graduate School of Natural and Applied Sciences of Gazi University. He served as a teacher at the Ministry of National Education, and as a Lecturer, Deputy Head of Department, and Head of the Software Department at Gazi University. During this period, he provided training in the fields of information technologies and digital transformation to various public institutions and organizations, primarily ministries. Upon assignment by the Council of Higher Education (YÖK), he served as a consultant in numerous projects within the scope of the E-Kızılay digital transformation at the Türk Kızılay.

He held positions as Information Technology Specialist, Head of Department, Vice President of the Information and Communication Technologies Authority (ICTA), and Head of Information Technologies at the Grand National Assembly of Türkiye. During this period, he carried out studies and projects aimed at contributing to institutional and digital transformation, focusing on digital transformation, information security, cybersecurity, and corporate innovation. In addition to legislative and regulatory studies in the fields of electronic communications, the Internet, and cybersecurity, he also worked on the implementation and supervision of these processes. He has articles published in national and international conferences and scientific journals, as well as authored and edited books related to his fields of expertise.

Dr. Mustafa Küçükali continues his work in the fields of digital transformation, corporate innovation, information security, cybersecurity, and digital awareness, and is currently serving as Director of Digital Transformation and Information Technologies at Kardemir A.Ş.
