

2025 Investor Presentation

STRONG EXPERIENCE INNOVATIVE TECHNOLOGY

Legal Disclaimer

This presentation includes information about Fonet Bilgi Teknolojileri A.Ş. (“Fonet” or the “Company”), together with analyses of its financial statements, as well as forward-looking statements reflecting the expectations and assessments of the Company’s management regarding events that may occur in the future. Although the information and analyses presented herein are believed to be accurate and the expectations are considered to be based on reasonable assumptions, actual results may differ from the projections and expectations stated in this presentation due to changes in the underlying factors and circumstances. Accordingly, Fonet, its directors, employees, or any other related parties shall not be held liable for any damages that may arise from the use of the information contained in this presentation.

This presentation, prepared with respect to the financial results for the year 2025, is based on the financial data of the Company prepared in accordance with the Turkish Accounting / Financial Reporting Standards and adjusted for inflation accounting in accordance with the provisions of IAS 29, in line with the decision of the Capital Markets Board dated 28.12.2023. (*)

(*) As announced in the Capital Markets Board Bulletin dated 28.12.2023 and numbered 2023/81, it has been decided that issuers and capital market institutions subject to the financial reporting regulations of the Capital Markets Board shall apply inflation accounting in accordance with the provisions of IAS 29, starting from their annual financial reports for accounting periods ending on or after 31.12.2023.

ABOUT US

- Established in 1997,
- With **29 years** of experience in health informatics,
- Health Information Management Systems (HIMS), Digital Health Transformation Solutions, Social Security Solutions, together with system integration and turnkey project delivery services.
- Actively operating more than 250 healthcare institutions across **8 countries**.
- Listed on the stock exchange, 500+ employees.

NATIONAL HEALTH DIGITAL TRANSFORMATION PLATFORM

End-to-end digital health solutions for all institutions and citizens across the healthcare ecosystem

- Fonet provides a comprehensive digital transformation platform that encompasses all stakeholders within the healthcare ecosystem.
- Primary, secondary, and tertiary healthcare institutions, the Ministry of Health, and citizens are able to securely perform all activities through a single, fully integrated ecosystem.
- Clinical, administrative, financial, and governance-related healthcare processes are managed end to end through the platform.
- The system is designed with a strong focus on data security, compliance with national and international standards, and advanced interoperability capabilities.
- Fonet delivers software, system infrastructure, and healthcare technologies through a single, unified point of service.

LABORATORY INFORMATION SYSTEM (LIS)

- ✦ The system manages all laboratory processes end to end, from test requests and sample reception to processing on devices, result generation, reporting, and archiving.
- ✦ Fonet LIS is a laboratory information system that ensures laboratory processes in healthcare institutions are fully integrated with the Hospital Information Management System.
- ✦ Full integration with medical devices allows results to be transferred to the system securely, promptly, and accurately.
- ✦ Barcoded, automated, and paperless workflows ensure accurate sample collection while minimizing human errors
- ✦ System provides physicians and patients with secure, seamless, and historical access to laboratory results.
- ✦ Internal quality control processes are supported with Levey-Jennings charts and Westgard rules, enabling the early detection of systematic errors.
- ✦ Through integrated management of inventory and consumables, it ensures the sustainability and efficiency of laboratory operations.

PICTURE ARCHIVING and COMMUNICATION SYSTEM (PACS)

- Fonet PACS is an integrated imaging and archiving platform developed to manage medical images, tailored to the needs of radiology departments and clinical units.
- It enables the secure, rapid, and standards-compliant creation, storage, and sharing of radiological images.
- With high processing capacity and rapid data transmission, it delivers uninterrupted performance even under heavy clinical workloads.
- Authorization, access control, and secure communication mechanisms support data security and patient privacy.
- Intelligent imaging and adaptive hanging protocols provide clinical assessment capabilities tailored to different user profiles.
- Its flexible storage architecture, fully compliant with DICOM and HL7 standards, enables seamless integration across institutions.
- Advanced 2D and 3D image processing capabilities enhance diagnostic and evaluation processes.
- With its internationally standardized architecture, it provides a scalable PACS solution suitable for global deployment.

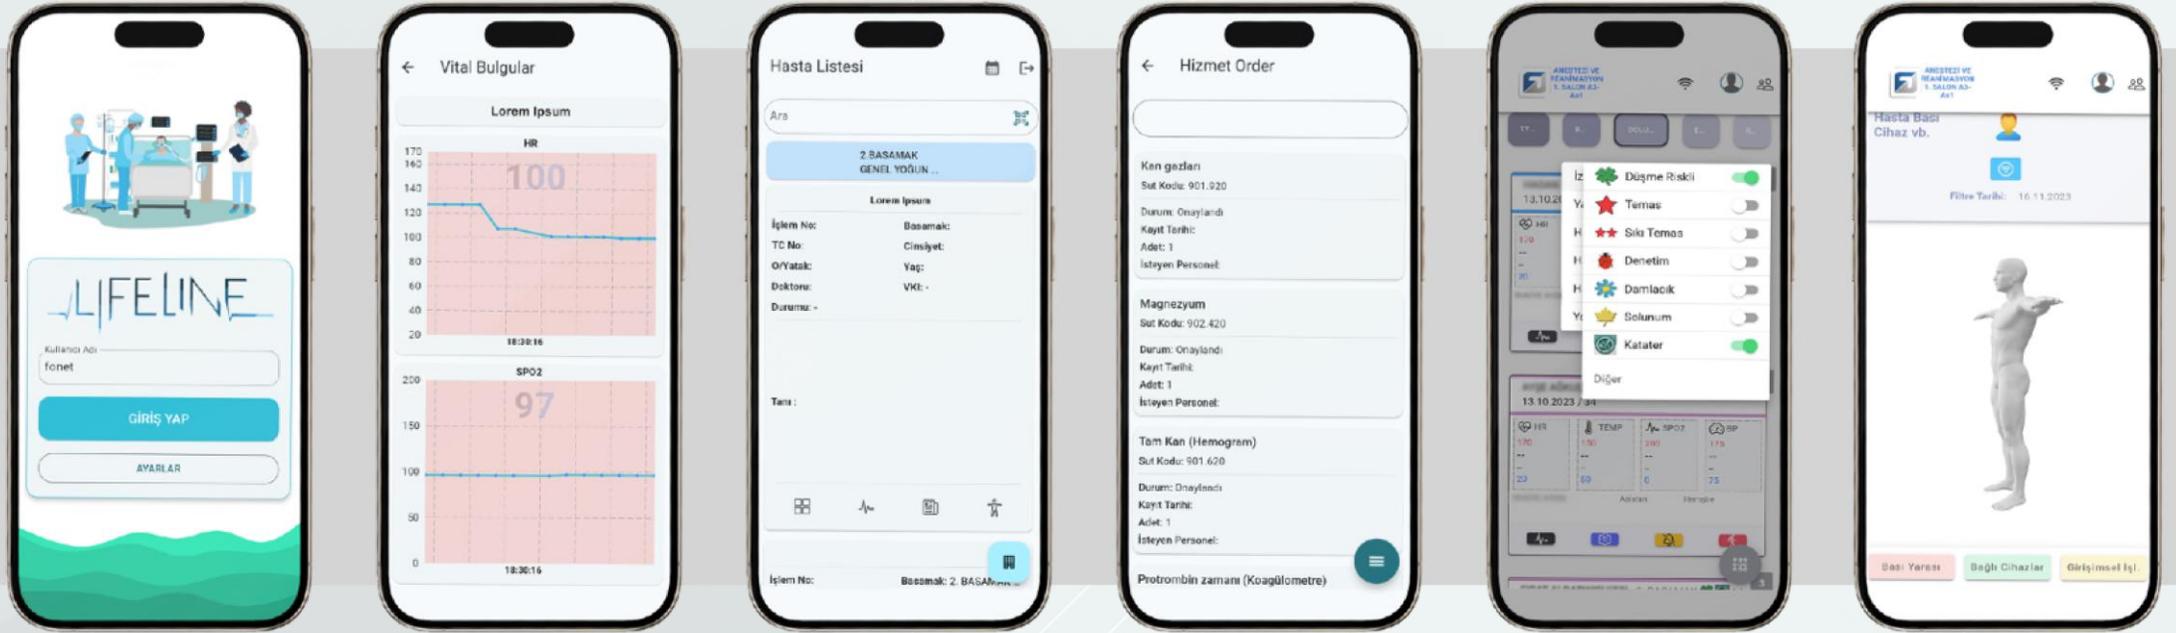

INTENSIVE CARE UNIT MANAGEMENT SYSTEM (LIFELINE)

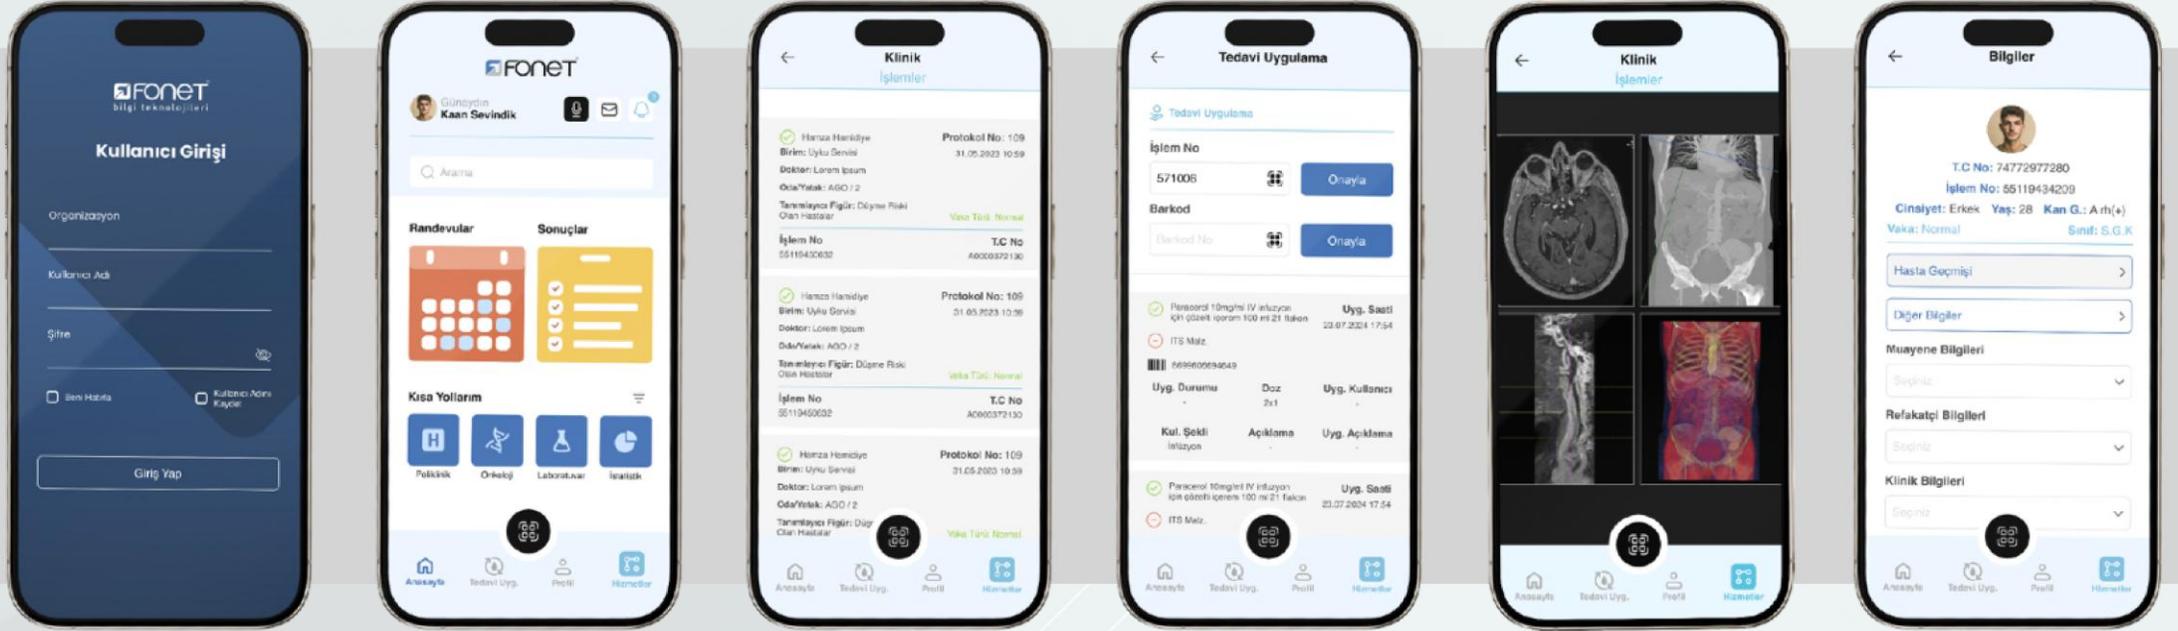

- The system manages the end-to-end digital tracking and treatment processes of intensive care patients.
- Real-time monitoring and early warning mechanisms are provided based on vital signs and ICU-specific clinical scoring.
- Full integration with bedside monitors and life-support devices is ensured, independent of brand or protocol.
- A holistic assessment of clinical processes is offered through centralized monitoring of intensive care data.
- Critical clinical information is securely and instantly accessible via mobile and desktop platforms.
- The system enhances patient safety and care quality through clinical decision support and early warning mechanisms.

DIGITAL HEALTH TRANSFORMATION SOLUTIONS

CENTRALIZED SYSTEMS and CITIZEN PORTALS

The Core of National Health Governance

- The coordination and traceability of healthcare services at the national level is provided.
- Citizen engagement with healthcare services is enhanced.
- The effective implementation of health policies is ensured.
- The sustainable management of public health is enabled.
- Data standards and security through centralized systems are ensured.
- A reliable data infrastructure for national decision support mechanisms is established.

HEALTHCARE PERSONNEL and HEALTHCARE FACILITIES MANAGEMENT SYSTEM

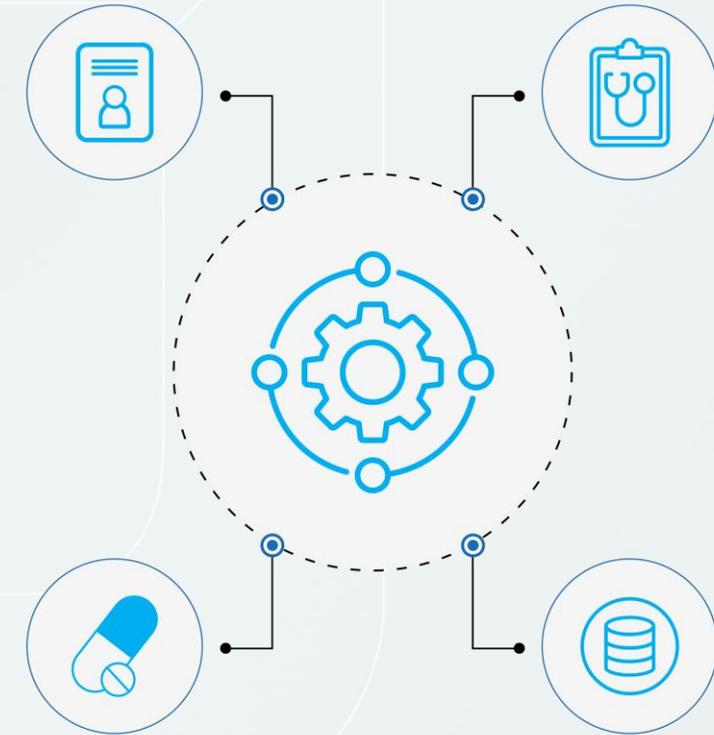

National-Level Centralized Healthcare Resource Management

- Through this nationwide system, all information regarding healthcare personnel and healthcare facilities is centrally managed
- Comprehensive and up-to-date records are maintained for all healthcare personnel, including their education, certificates, and affiliated institutions.
- All processes for healthcare facilities, including licensing, openings, inspections, enforcement actions, support, incentives, and closures, are carried out efficiently and traceably in accordance with relevant regulations.

PRIMARY CARE MEDICAL EXAMINATION INFORMATION SYSTEM

- **Full Integration and Centralized Management:** Through a fully integrated structure connecting family physicians, community health centers, and relevant national systems, primary care services are managed comprehensively via a single platform.
- **Patient Registration, Appointment, and Process Tracking:** Patient registration, appointments, referrals, and application processes are centrally monitored, ensuring service continuity and traceability.
- **Examination and Clinical Process Management:** Examination records, diagnoses, treatments, and clinical evaluation data are digitally managed in accordance with standards and securely accessed by authorized users.
- **Prescription and Medication Management:** Electronic prescription processes, medication usage, and reimbursement mechanisms are fully integrated to enhance patient safety and process accuracy.
- **Preventive Health and Monitoring Services:** Vaccinations, pediatric monitoring, chronic disease follow-up, and periodic health checks are systematically planned and tracked.
- **Data-Driven Decision Support and Reporting:** Clinical and administrative data related to primary care services are made analyzable and reportable to support informed decision-making.
- **Service Efficiency and Resource Optimization:** Digitalization reduces workload, optimizes resource utilization, and enhances the overall effectiveness of primary healthcare services.

PHARMACEUTICAL TRACK and TRACE SYSTEM

National-Level Medication Safety and Traceability

- The system monitors the licensing, production, distribution, and consumption processes of medications.
- Full traceability and record security are ensured.
- The system facilitates counterfeit medication control and establishes a secure supply chain.
- It optimizes inventory management and recall processes.
- It enhances the control and transparency of public expenditures.
- It ensures continuous compliance with national medication policies.

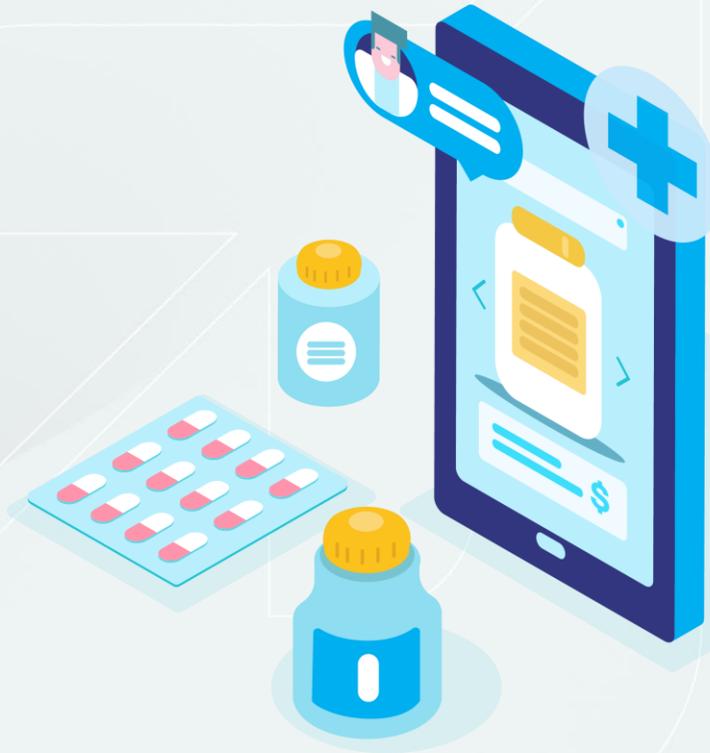

e-Prescription e-Pharmacy

Safe Medication Management in the Healthcare System

- Prescriptions are created and managed digitally in a secure, unique, and traceable manner.
- Prescription contents are verified using barcode and QR code technologies, and generic medication processes are tracked through the system.
- Patient safety is enhanced by eliminating errors originating from paper-based and handwritten processes.
- For pharmacies, prescription viewing, inventory tracking, and reimbursement processes are carried out efficiently according to defined rules.

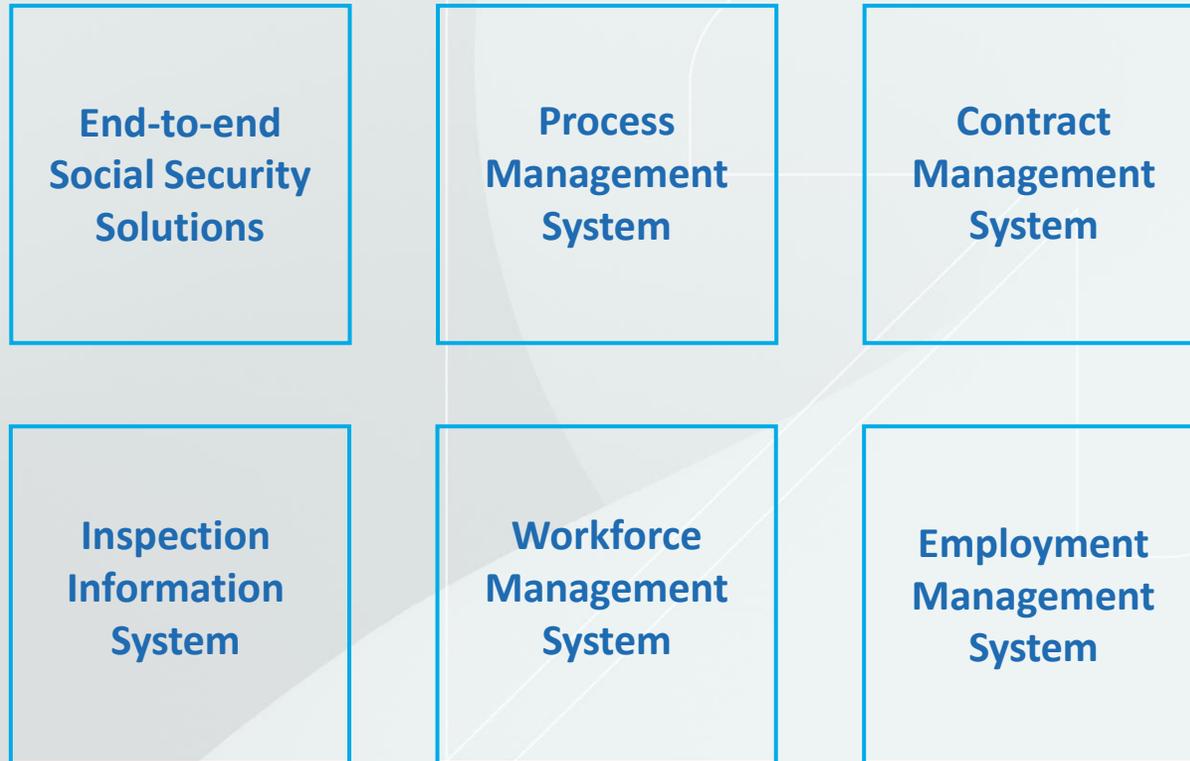

PERSONAL HEALTH RECORD (PHR)

Patient-Centered Healthcare

- ✔ PHR provides citizens with secure and uninterrupted access to their health records across all healthcare facilities via mobile and web channels.
- ✔ It enables holistic monitoring of all health data related to consultations, tests, and treatments from a single centralized platform.
- ✔ It enables citizens to securely access their personal health history with controlled permissions.
- ✔ The system ensures rapid and uninterrupted access to health information through mobile and web platform access.
- ✔ By enabling access to patients' previous consultations, tests, and treatment records, it facilitates continuous clinical follow-up.
- ✔ It guarantees data integrity and continuity by operating in full integration with national health information systems.

SOCIAL SECURITY SOLUTIONS

INSURANCE and SOCIAL SECURITY SOLUTIONS

Insurance and Social Security Solutions: Citizen-Centric Digital Social Security Management

- ✔ Healthcare and insurance processes are managed digitally for citizens and beneficiaries.
- ✔ It reduces bureaucracy and ensures resource efficiency in insurance processes.
- ✔ Monitoring, analysis, and reporting are provided for workforce-related purposes.
- ✔ Social aid, foster care, and adoption processes are supported in compliance with regulations.

MODERN TECHNOLOGY and ACCESSIBILITY

Web-Based and Mobile Applications

- The web-based platform requires no additional licenses or installation.
- It ensures easy access and user-friendly experience for all users.
- Mobile applications offer support for both Android and iOS.
- High performance and user experience are prioritized.
- Systems allow secure access from any device.
- The platform delivers a flexible and scalable digital experience.
- The system provides multilingual support on both web and mobile platforms.

HARDWARE and INFRASTRUCTURE COMPETENCE

Fonet's End-to-End Infrastructure and Hardware Solutions

- **Data Center and Server Infrastructure:** Fonet provides data center and server infrastructures designed with a national data management approach, prioritizing high availability, business continuity, and data security.
- **Network and Communication Infrastructure:** It designs and implements network infrastructures that enable secure, scalable, and uninterrupted data transmission between healthcare facilities and centralized systems.
- **Medical Device Integration:** Full integration with laboratory, imaging, intensive care, and other clinical devices ensures accurate and real-time transfer of clinical data to the system.
- **Modular and Sustainable Infrastructure:** Modular, long-term sustainable architectures allow rapid adaptation for new facilities and infrastructure expansion needs.
- **Integrated Health Platform Approach:** By integrating hardware, infrastructure, and software solutions, it creates an end-to-end enterprise digital health platform.

ACHIEVEMENTS and VALUE

Fonet Digital Health Platform – End-to-End Solution

- Fonet provides end-to-end digital health solutions encompassing all healthcare stakeholders nationwide.
- Clinical, administrative, and financial processes related to healthcare services are managed through a single, integrated platform.
- By addressing software, hardware, and infrastructure holistically, it creates a sustainable digital health ecosystem.
- Real-time, secure, and accurate data generation supports decision-making and health policy processes.
- Citizens are provided secure access to healthcare services and their health history via mobile and web platforms.
- Its scalable architecture enables long-term digital transformation aligned with the national health vision.

TALES ERP

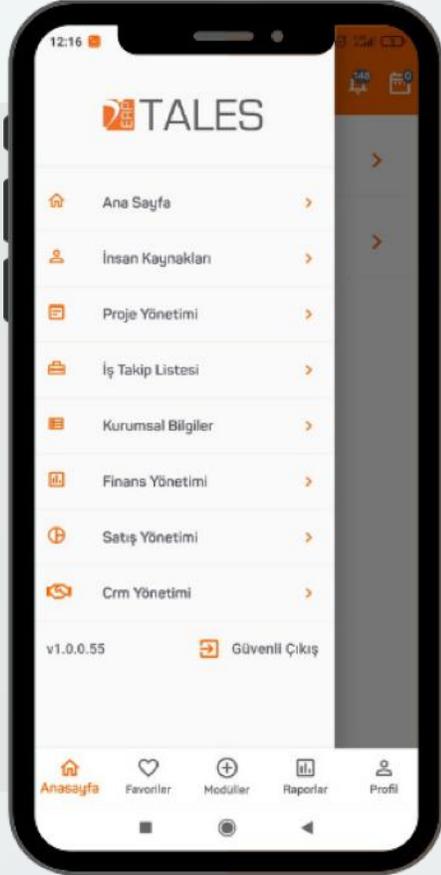

Our subsidiary PiDATA has developed TALES ERP, which is used by corporate clients across multiple sectors, including defense, IT, services, public sector, and construction.

TALES ERP is an integrated, next-generation Enterprise Resource Planning solution developed with modern technologies to meet the needs of both public institutions and private enterprises.

TALES ERP combines various processes into a single platform, including business tracking and project management, HR management, sales and marketing management, customer relationship management, and help desk management.

TALES ERP ensures business processes are easier, more efficient, sustainable, faster, and cost-effective.

HR

Manage HR tasks directly from mobile.

E-DIRECTORY

View, call, and message your customers and company contacts.

PROJECT MANAGEMENT

Track your project processes.

FINANCE MANAGEMENT

Process your payment transactions.

TASK MANAGEMENT

Organize tasks and manage progress with Stop/Start.

SALES MANAGEMENT

Keep track of your Sales and Tender processes.

NOTIFICATION

Get your notifications in your mobile instantly.

CRM

Keep track of meetings and visits to your clients.

Our software included within TALES ERP:

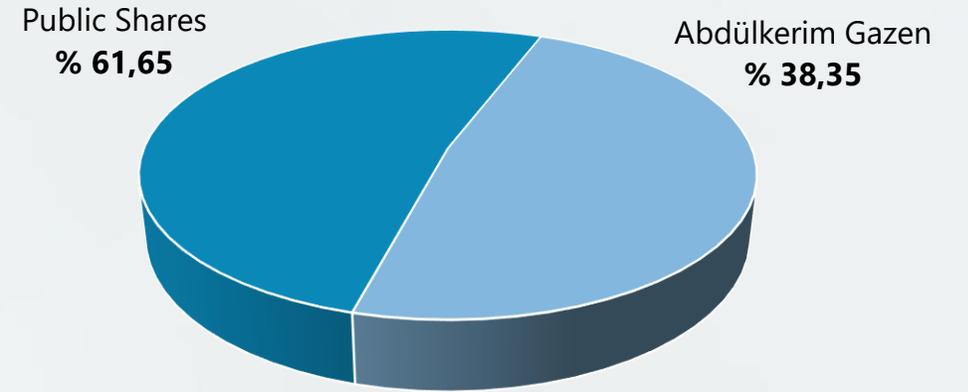

- ❏ **TASK MANAGEMENT SYSTEM**
- ❏ **PROJECT MANAGEMENT MODULE**
- ❏ **CRM**
- ❏ **SALES MANAGEMENT**

Capital Structure

EXECUTIVE SUMMARY

Income and Net Profit Performance

2025 was a year of strong financial results. Net sales revenues increased by 36% year-on-year, reaching TL 855 million. Net profit reached TL 222,8 million, representing a 13% year-on-year increase.

Financial Performance

With our high value-added projects, EBITDA increased by 86% year-on-year, to reaching TL 378 million, resulting in an EBITDA margin of 44,21%.

Indebtedness

Low leverage indicates that the company has strong borrowing capacity, and the Net Debt/EBITDA and Net Debt/Equity ratios point to a positive outlook. In 2025, a net cash surplus of TL 106,7 million was generated.

Expectation

In 2026, excluding IAS 29, revenue growth is targeted in the range of 60–70%, with a net profit margin of 30–40% and an EBITDA margin of 40–50%.
